

Incite Supply Chain Platform

The manufacturing of composite products – such as consumer electronics, passenger vehicles, and processed foods – depends on smooth functioning supply chains that deliver the right components at the right time. But as the pandemic has so dramatically demonstrated, external factors can disrupt a product's supply chain, presenting a considerable challenge in predicting changes and protecting operations.

The Incite Supply Chain Intelligence Platform enables manufacturers to visualize their entire supply chain, mapping it against potential disruptive external events. This tool allows companies to be forewarned about issues before they affect manufacturing plants and prepare for events that might impact supply, such as significant weather events, labor strikes, armed conflicts, or piracy. By better understanding disruptions to suppliers and logistics, manufacturers can adjust plant capacity, ramp up new suppliers, offset production losses, and implement contingency plans to safeguard their business.

Instantly visualize how current events – such as hurricanes, earthquakes, labor strikes, armed conflicts, or piracy incidents – impact business operations.

Anticipate impacts

Harness the predictive power of Incite's Supply Chain Intelligence platform to evaluate potential disruptions in real time. Using advanced analytics, ensure continuous operation of manufacturing processes.

Prevent interruptions

With visibility into global events mapped against supply chain dynamics, mitigate risks and safeguard operations. Recognize threat patterns early to adapt strategies and maintain an uninterrupted production flow.

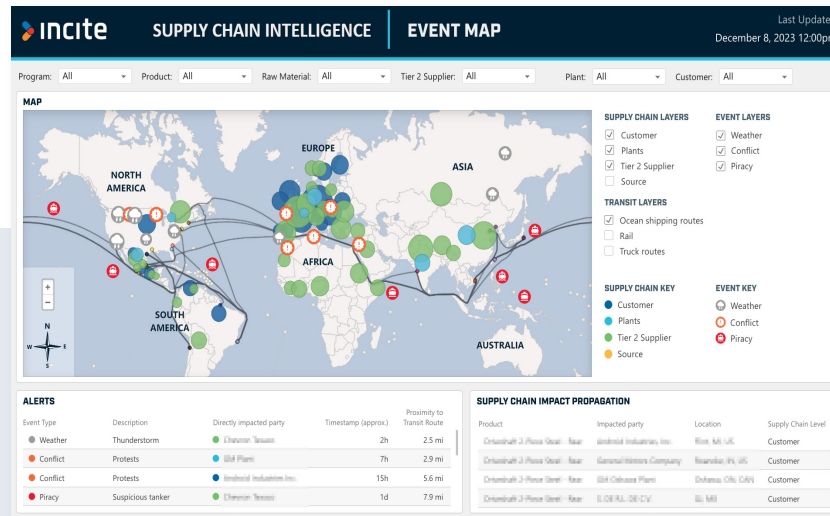

Events are weighted by severity and proximity to plants and routes between facilities to swiftly prioritize reactions to external disruptions.

Understand exposure

Gain detailed insights into supply chain vulnerabilities using comprehensive visualization tools. Assess risk exposure against global events and adapt procurement strategies for increased resilience.

Bridge information gaps

Get a full overview of supply networks with in-house data, supplier information, and AI-driven insights. This provides the intelligence to make informed decisions across supply chains, including secondary and tertiary suppliers

Examine diverse scenarios and their potential impacts to reinforce supply chains against the unpredictable.

About Incite

Incite is transforming the analytics space by solving complex business problems that are fundamental to success in a digitally dominated landscape. The company's unique and people-focused approach allows them to partner with clients to frame, solve, and execute on a wide range of challenges to create long-term value. Fortune 500 companies across multiple industry sectors have relied on Incite's carefully curated senior team of practitioners to help them in a variety of mission-critical applications including increased manufacturing uptime, autonomous-vehicle deployment, improved physician performance, and exceptional customer experiences. Founded in 2010, Incite is headquartered in Detroit.
